Instructions

- Put all of this code inside a folder named `week1-day2-html-css`, and put the folder in a place where you normally code.
- Use the command line to make a folder called `css`.
- Use the command line to make a file called `style.css` inside of thee `css` folder.
- Reference the `style.css` in your `student-bio.html` file. You do this by placing `<link rel="stylesheet" type="text/css" href="css/style.css">` inside the `<head>` tag.
- Style the example on the projector.
  - Add a `class` called "container" on the `div` tag.
  - Add an `id` called "main-bio" for the first `section` tag.
  - Add an `id` called "contact-info" for the second `section` tag.
  - Add an `id` called "bio-image" for the bio image.
- Style specs:
  - `body`
    - The background color is `#efeee7`.
    - The font used `"Georgia",Times New Roman,Times,serif;`.
    - The font color is `#333333`.
    - Be sure to zero out the body margins and padding so the page is flush to the top of the page:
    - ```css
      body {
        margin: 0;
        padding: 0;
      }
      ```
  - `header`
    - The background color is `#333333`.
  - `h1`
    - The font color is `#eee`.
    - The font size is `28px`.
    - Look at the example on the screen, and eyeball the padding and/or margins and positioning of the text.
  - `h2`
    - The font size is `24px`
  - Make the container have a width of 1024 pixels, and center it. You do this using `margin: 0 auto;`.

- - Make `#main-bio, #contact-info, #bio-image` all `float: left`.
  - Make the `#bio-image` have a width of 200 pixels.
  - Be sure to include `alt` text in all images
  - `#main-bio` should have a width of `70%`.
    - Add margins to the image so there is distance between it and the bio text.
  - `#contact-info` should have a width of `30%`.
  - Adjust the line height so it is 1.5 times the size of the font.
  - Make the link color `#d21034`.
- If you forgot how to write the CSS properties, you can reference all CSS properties here https://developer.mozilla.org/en-US/docs/Web/CSS/Reference
- Bonus:
  - Stage, commit, and push this new file to Github.
